

# AXI FV SERIES

INTERNATIONAL™ Pressure Filter Housing

The AXI FV Series Pressure Vessels are a powerful addition to any tank cleaning & filtering system. The FV series is made from durable carbon steel, and provides large capacity, heavy-duty fine filtration and water removal for tank cleaning jobs with sludge, rust scale, and other contaminants.

## AXI FV SERIES FEATURES:

- Cost Effective Filtration
- Easy Connectivity
- Easy Filter Cartridge Replacement
- Large Holding Capacity For Contaminants
- Wide Range Of Filter Cartridge Micron Sizes

The filter connects to existing fuel storage systems utilizing NPT threaded or flanged connections. Vessels are equipped with one (1) inlet, one (1) outlet, drain, and differential pressure gauge ports. Filter housings use up to eight (8) filter cartridges to remove particulate from 2 to 30  $\mu$ . Water block cartridges are available from 5-30 $\mu$ . All the FV Series are capable of filtering gasoline, ethanol blends up to E15, biodiesel blends up to B100, diesel fuel, and fuel oils. Industrial fluids, such as lubrication oils, hydraulic oils, synthetic oils, transformer oils, and many solvents and thinners, may be filtered.
